

Deaths

Metric Name	Last Week	This Week	Difference	Trend
1. Number of COVID-19 deaths	1	0	-1	
2. Cumulative Number of COVID-19 deaths	389	389	0	
3. Excess deaths	-5.8	3.4	9	

This Week: 07/03/2022 - 13/03/2022

Last Week: 28/02/2022 - 06/03/2022

This week there have been 0 deaths due to COVID-19 and the total number of COVID-19 deaths remains at 389.

Looking at all causes of death, there were more deaths this week than in the same week the previous year.

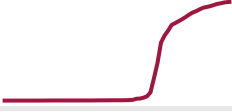

Cases

Metric Name	Last Week	This Week	Difference	Trend
4. Cumulative number of cases	60,501	61,865	1,364	
5. Number of cases	926	1,364	438	
6. Number of cases Pillar 1	108	137	29	
7. Number of cases Pillar 2	818	1,227	409	
8. Incidence per 100,000	335	494	159	
9. Cumulative case rate	21,917	22,412	1,364	
10. Cumulative possible number of reinfections	2,477	2,602	125	

This week 1,364 cases of COVID-19 were diagnosed. Of these, 137 were diagnosed through Pillar 1, and 1,227 through Pillar 2. This has increased the total number of COVID-19 cases to 62,541.

From Monday 31 January, the UK Health Security Agency (UKHSA) now includes data on possible reinfection in its data collecting. Those testing positive beyond 90 days of a previous infection will be considered a reinfection. The dashboard reflects this change.

Vaccinations

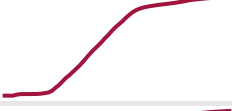

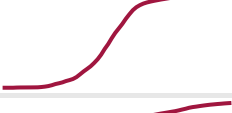

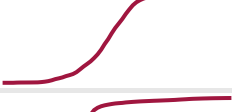

Metric Name	Last Week	This Week	Difference	Trend
11. Number with first dose, aged 12-15	4,484	4,498	14	
12. Proportion received first dose, aged 12-15	44.9%	45.1%	0.1%	
13. Number with first dose, aged 16+	173,994	174,204	210	
14. Proportion received first dose, aged 16+	66.6%	66.7%	0.1%	
15. Number with first dose, aged 16-49	116,852	117,054	202	
16. Proportion received first dose, aged 16-49	61.1%	61.2%	0.1%	
17. Number with first dose, aged 50+	57,142	57,150	8	
18. Proportion received first dose, aged 50+	81.5%	81.5%	0.0%	

This Week: 07/03/2022 - 13/03/2022

Last Week: 28/02/2022 - 06/03/2022

A total of 178,702 1st dose vaccinations have been administered to date. This is a change of 224 from the previous week.

Vaccinations

Metric Name	Last Week	This Week	Difference	Trend
19. Number with second dose, aged 12-15	2,514	2,593	79	
20. Proportion received second dose, aged 12-15	25.2%	26.0%	0.8%	
21. Number with second dose, aged 16+	158,171	158,428	257	
22. Proportion received second dose, aged 16+	60.5%	60.6%	0.1%	
23. Number with second dose, aged 16-49	103,088	103,326	238	
24. Proportion received second dose, aged 16-49	53.9%	54.0%	0.1%	
25. Number with second dose, aged 50+	55,083	55,102	19	
26. Proportion received second dose, aged 50+	78.6%	78.6%	0.0%	

This Week: 07/03/2022 - 13/03/2022

Last Week: 28/02/2022 - 06/03/2022

A total of 161,021 2nd dose vaccinations have been administered to date. This is a change of 336 from the previous week.

This Week: 07/03/2022 - 13/03/2022

Last Week: 28/02/2022 - 06/03/2022

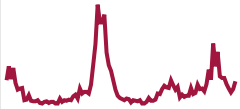

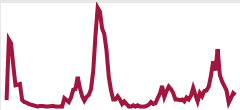

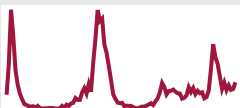

## Testing

Metric Name	Last Week	This Week	Difference	Trend
27. Percentage of individuals who tested positive	11.2%	15.0%	3.8%	
28. Individuals tested per 100,000 population (includes pillar 1&2 tests)	259	279	20	

This week the COVID-19 testing rate is 278.8, per 100,000 residents. This has increased from last week's rate of 258.7 per 100,000. The positivity rate for recorded tests is 15.00% which has increased from last week.

Contact tracing ceased on the 24th February 2022

Other data

Metric Name	Last Week	This Week	Difference	Trend
32. UCLH NHS Trust Hospital new admissions (weekly)	27	41	14	
33. Whittington Health new admissions (weekly)	22	19	-3	
34. Royal Free London NHS Foundation Trust new admissions (weekly)	66	88	22	

Metric Name	Last Week	This Week
35. R Number for London	0.8 to 1.1	0.8 to 1.1

This Week: 07/03/2022 - 13/03/2022

Last Week: 28/02/2022 - 06/03/2022

This week there have been 148 admissions to local hospitals due to COVID-19. This has increased from the past week.

Notes

- 1 - Number of Covid-19 deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.
- 2 - Cumulative number of Covid-19 deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.
- 3 - Excess deaths: Due to time taken to process deaths data, figures are presented with a one-week delay.
- 8 - Incidence per 100,000 population: This is RAG rated: Maroon >250 cases per 100,000, Dark red 151 to 250 per 100,000, Red 51 to 150 per 100,000, Amber 25 to 50 per 100,000, Green <25 per 100,000
- 10 - Cumulative possible number of reinfections: Infection episodes are counted separately if they are more than 90 days apart.
- 27 - Percentage of individuals who tested positive: This indicator is RAG rated Red >7.5%, Amber 4% to 7.5%, Green. Positivity of all individuals with a valid test in the week shown. Excludes Lateral Flow Tests.
- 28 - Individuals tested per 100,000 population (includes pillar 1&2 tests): This indicator uses PHE's adjusted approach to testing metrics. Individuals with a negative test are deduplicated across the preceding 7 days, to exclude repeat negative tests arising from recent multiple testing
- 32 - UCLH NHS Trust Hospital new admissions (weekly): New admissions who tested positive for Covid-19 in 14 days before admission or in hospital after admission. Hospitals covered here serve local residents as well as other boroughs, so admissions may not be our residents.
- 33 - Whittington Health NHS Trust Hospital new admissions (weekly): New admissions who tested positive for Covid-19 in 14 days before admission or in hospital after admission. Hospitals covered here serve local residents as well as other boroughs, so admissions may not be our residents.
- 34 - Royal Free London NHS Foundation Trust hospital new admissions (weekly): New admissions who tested positive for Covid-19 in 14 days before admission or in hospital after admission. Hospitals covered here serve local residents as well as other boroughs, so admissions may not be our residents.
- 35 - R Number for London: The estimate for the R number is updated on a slower timescale than other indicators. Low case numbers and/or a high degree of variability in transmission across the region means these estimates are insufficiently robust to inform policy decisions.
