

APPENDIX B.1

Housing Asset Management Strategy 2025 - 2030

Proposed Capital Programme

Introduction:

This document sets out in more detail the proposed 5-year capital programme. This is organised according to the different work types. Where possible indicative block listings are provided.

In all cases the condition of the building or system would be subject to detailed surveys prior to any capital works commencing; in certain circumstances this may lead to a decision to defer that work to the block until a later year. In all cases the Council will prioritise repair over replacement unless there are regulatory requirements which can only be achieved through renewal.

The work programmes are as set out in the contents table below. For each section the document sets out both the current programmes which are already approved and the proposed new programmes.

Contents

1. Fire Safety	2
2. District Heating	3
3. Lifts	4
4. Other Communal M&E Programmes	5
5. External Better Homes	6
6. Internal Better Homes	8
7. Retrofit and Energy Efficiency	10
8. List of Blocks within Programmes	11

1. Fire Safety

Current Programme:	£55m
No. homes in current programme:	All homes
<p>The council has an extensive programme of fire safety works, and from April 2024 there were budgets of £55m still assigned. This programme involves a comprehensive review of fire safety requirements across all homes, though many will have all improvements complete to date. Most of the remaining fire safety works is to the communal areas of blocks of flats. Typical work includes communal and flat front entrance door replacements, loft compartmentation, and installation of dry risers.</p> <p>There is one major cladding replacement programme at Birkenhead Estate. This work is expected to be concluded by December 2025.</p> <p>This budget does not include the completion of the work at the Chalcots estate which is due for completion of summer 2025.</p>	
Proposed New Programmes:	£70m
Block listing available:	No, but HRBs listed
Estimated no. of homes in programme:	Up to 8,400
Key work to inform properties within programme:	Fire Risk Assessments Building Safety Case Files
<p><u>Programme Description:</u></p> <p>The new programme allocates an additional £4m for ongoing FRA actions; this has been allowed at £1m a year. It is expected that following such significant investment in recent years and continuing throughout 2025 that the need for capital FRA actions will be low.</p> <p>The council has 188 high rise buildings (HRBs) which will require Building Safety Case files over the coming 5 years. The safety case files have a wider remit than fire safety, in particular, focusing on structural safety. The key risk identified in the coming years is that, despite the extensive fire risk assessments, these will identify the need for additional investment. At time of writing the first 5no. Building Safety Case Files have been submitted; no additional works have been identified yet. Given the importance of any such work if identified, the council has made a provisional allowance of £350k per high rise building.</p> <p>A list of HRBs is available in section 8 of this report.</p> <p>The key benefits of this work are that it will improve the safety of homes and achieve compliance with the Building Safety Act.</p>	

2. District Heating

Current Programme:	£57m
No. homes in current programme:	5,591
<p>The council operates c. 200 district heating systems to over 12,500 homes representing about a third of all Camden's homes. The current investment programme includes work to 27 systems. These have been identified based on age, operational issues (e.g. repair frequency) and condition.</p> <p>The current projects include full system renewals, improvements to the distribution networks and metering, and renewals to plant rooms. The scope of the project is based on detailed surveys and the condition of each system.</p>	
Proposed Programme:	£42m
Block listing available:	Yes
Estimated no. of homes in programme:	2,720
Key work to inform properties within programme:	Internal system condition review
<p><u>Proposed Programme:</u></p> <p>The current programme priorities have been identified based on the stock condition survey and current operations. A focus will be on ensuring some older style of systems will be modernised, for example warm air heating system. The blocks identified are a priority list; this will be reviewed based on condition to ensure that over the strategy period, investment is directed at the homes in greatest need.</p> <p>Works will be commissioned based on detailed surveys; some systems will require a full system renewal, in other cases the system may only require a plant room renewal.</p> <p>The key benefits of this work include:</p> <ul style="list-style-type: none"> - Improved energy efficiency of homes and lower energy bills for residents - Improved heating controls and metering - Ensuring the heating system meets the Decent Homes standard 	

3. Lifts

Current Programme:	£6m
No. homes in current programme:	1,062
<p>Camden has invested extensively in lift renewal in the past 15 years; over 80% of lifts are under 15 years old. The existing lift replacement programme has been developed based on age, breakdown history and frequency of need for replacement parts. These have then been prioritised based on the type of block and how many lifts are available within the block.</p> <p>The current programme contains provision to renew 25 lifts in two phases of work.</p>	
Proposed Programme:	£7m
Block listing available:	Yes (for the first 10 lifts)
Estimated no. of homes in programme:	At least 327
Key work to inform properties within programme:	Internal lift condition review
<p><u>Programme Description:</u></p> <p>It is proposed that additional funds are allocated based on the prioritisation method described above; this will allow for the immediate commissioning of a further 10 lifts and a further budget provision to replace lifts that fail during the programme period; this would be in response to condition and breakdowns. The additional budget provision would allow the replacement of a further 15-20 lifts. In general lifts will be renewed, but in some cases there may be renewal of some key parts only; e.g the motor room.</p> <p>A block listing is provided for existing and proposed programmes; these are blocks where at least 1 lift is proposed for work. This does not mean all lifts in the block would have work.</p>	

4. Other Communal M&E Programmes

Current Programme: £14m	
<p>This section covers a range of other communal M&E systems including:</p> <ul style="list-style-type: none"> - Communal and Emergency Lighting - Communal Electrical Supplies - Communal Ventilation Systems - Door Entry Systems - Bulk Gas Network <p>There are also a range of active fire safety systems such as:</p> <ul style="list-style-type: none"> - Automatic Opening Vents - Dry Risers - Sprinkler systems <p>The budgets for these systems for current programmes are contained under the Fire Safety section above. All of these systems are subject to routine servicing and inspections and the need for capital works is based on a review of these inspections, along with a review of any regulatory requirements.</p>	
Proposed Programme:	£44m
Block listing available:	No
Estimated no. of homes in programme:	5,000 – 9,000
Key work to inform properties within programme:	Cyclical inspection programmes
<p><u>Programme Description:</u></p> <p>The budget provision has been made based on condition surveys, and internal review of information of failure rates of components. As with the current programme, all of these systems are subject to routine servicing and inspections and the need for capital works is based on a review of these inspections, along with a review of any regulatory requirements.</p> <p>While there will likely be blocks which require more than one type of work under this category, these works will usually be delivered as specialist projects (e.g. communal electrics only or dry riser only); this is to ensure that contractors with the appropriate qualifications are sourced for the work.</p> <p>The key benefits of this work vary by type of system but include:</p> <ul style="list-style-type: none"> - Improved energy efficiency (e.g. of lighting systems) - Improved fire safety of the building (e.g. for dry risers) - Improvements to newest standards and features 	

5. External Better Homes

Current Programme:	£65m
No. homes in current programme:	3,647
<p>The works to these blocks was identified through the previous stock condition survey in 2018 or through subsequent casework and surveys. Full detailed scoping has been undertaken for most of these or will be for the small number not yet completed. Works required have been assessed and repair rather than replacement will be prioritized wherever possible. However, due regard for value for money and the significant costs for provision of access, e.g. scaffolding, is taken into account when reaching a decision.</p> <p>These works are then tendered and formal consultation undertaken before commencing.</p>	
Proposed Programme:	£108m
Block listing available:	<p>Yes to 2027/28</p> <p>No for years 2028/29-2029/30</p>
Estimated no. of homes in programme:	<p>4,600 to 2027</p> <p>3,300 for years 2028-2029</p>
Key work to inform properties within programme:	External Stock Condition Survey
<p><u>Programme Description:</u></p> <p>The stock condition survey carried out in 2023 has identified clear repair years for key building elements for the years 2023-2027. However, there are limitations to the survey; it is based on external visual inspection only and it does not seek to diagnose the level of works necessary. For example, with roofs and windows with a repair year identified in this period, for some a repair will be sufficient, for others a complete replacement will be necessary. Detailed surveys in the programme year will finalise this with consideration given to the condition, costs, and the particular building design (especially where these are protected under conservation or listed statuses).</p> <p>The council has also drawn on internal knowledge of the buildings in preparing the programme.</p> <p>The proposed programme includes all blocks where the stock condition survey has indicated a main roof or window renewal is required up to 2027. In the cases of blocks where only minor external repairs are affecting decency (e.g. chimneys), works will be delivered via the repairs service.</p>	

External works for the years 2028 and 2029 will be subject to a planned updated stock condition survey in 2028. In line with best practice the council carries out 5-yearly external stock condition surveys.

The scope of work will be kept to core works required to maintain the decent homes standard and ensure residents are safe in their homes. Consideration will be given to efficient use of safe access systems (usually scaffolding). The prioritisation will be:

- Ensuring external elements are in a condition which satisfies the Decent Homes standard (includes, windows, roofs, chimneys);
- Attending to repairs which present a serious safety hazard or are at risk of causing disrepair
- Elements will be repaired where possible, and replaced only where this is not economically or technically viable.

Some additional works may be considered where there are available budgets, and it is shown to be financially and technically advantageous to complete these as part of a wider works programme. In particular, the scope may be extended to repair or renewal of elements under the Decent Homes standard which the Stock Condition Survey suggests will need work in the coming 5 years.

Note that in some cases works under this programme may be delivered as part of the retrofit programme, as some core DH work (e.g. roof renewal to improved insulation standards) contributes to improving the energy rating of the homes.

The key benefits of this work include:

- Removes safety hazards to the exterior
- Reduces leaks especially from roofs and downpipes
- Improves energy efficiency of homes where roofs and windows are renewed

6. Internal Better Homes

Current Programme:	£13m
No. homes in current programme:	200
<p>The stock condition survey carried out in 2023 included internal surveys within homes for 10% of our tenanted properties. This identified a number of homes where Kitchens and/or Bathroom components were failing and these have been developed into a programme for delivery over the next 12/18 months. For bathrooms only failing components will be replaced e.g. just a bath or just a WC not all components unless all are failing.</p>	
Proposed Programme:	£40m
Block listing available:	No
Estimated no. of homes in programme:	4,000 – 8,000
Key work to inform properties within programme:	Internal Stock Condition Survey
<p><u>Programme Description:</u></p> <p>This programme contains a provisional estimate only; an initial 10% survey will inform some programme delivery, and has been used to estimate the total investment need. There is a condition survey underway at present to complete internal surveys to all homes and these will inform the full list of homes requiring work.</p> <p>The council also operates a 5-yearly dwelling electrical testing programme and an annual gas safety and servicing programme. These will be used to assess the condition of electrical and heating systems and commission system renewals as required, and to a suitable timescale as indicated by the condition report.</p> <p>Work will be commissioned to ensure the home is maintained to meet the Decent Homes standard. Kitchens and bathrooms are non-key elements under Criterion B, meaning that it is possible for one to be in poor condition and the home still pass decency. The same is true under Criterion C which considers the age of K&Bs. This approach will be revised should there be a relevant change in the upcoming revision to the Decent Homes standard.</p> <p>It will usually be necessary to carry out an electrical test (EICR) as part of kitchen or bathroom replacement works. Where this identifies that a rewire is necessary it will be done as part of the same project. The main programme for identifying rewires is the 5-yearly electrical testing programme. This is also included in the budgets above.</p> <p>Where necessary, extract fans will be added or replaced as part of kitchen and bathroom renewal projects.</p>	

The internal SCS will have included a HHSRS. Cat 1 Hazards are acted on immediately but lower hazard category works may be programmed in with necessary K&B works.

In more limited circumstances an internal works programme will also include improvements to the heating system in the home (e.g. replacement boiler, heating controls), though as there is an annual gas inspection programme these investment needs are usually identified and acted on then. These budgets are also included above.

The key benefits of this work vary depending on the types but includes:

- Modernised facilities for residents
- Removes safety hazards to the interior of the home
- Improved energy efficiency of heating systems

7. Retrofit and Energy Efficiency

Current Programme:	£8m
No. homes in current programme:	300
The current programme of retrofit work relates to the Council's successful bid for grant funding under Wave 2 of the Social Housing Decarbonisation Fund (SHDF). The Council has identified the properties involved as the least energy efficient of our homes which also fulfill the grant funding conditions.	
Proposed Programme:	£15m
Block listing available:	Maintained separately, schemes added to align with grant funding opportunities.
Estimated no. of homes in programme:	750 – 1,500
Key work to inform properties within programme:	EPC C surveys Grant fund terms
<p><u>Programme Description:</u></p> <p>The council intends to build on previous successes in securing grant funding for retrofit works, and will plan future programmes with an intent to target new rounds of grants. The Council has a long-term strategic plan for the retrofit of its homes which is maintained as a separate register; this generally prioritises homes which are the least energy efficient. Schemes would be allocated based on this prioritisation and depending on available grant opportunities, and coordination with planned programmes (for example it may be beneficial to complete retrofit works at the same time or just ahead of a planned communal heating upgrade).</p> <p>The key benefits of this work includes:</p> <ul style="list-style-type: none"> - Improved energy efficiency of the building and reduced bills for residents - Reduced instances of damp and mould - Improved ventilation systems 	

8. List of Blocks within Programmes

The table is a list of blocks within those programmes where such detail is available. Years highlighted in grey, means that these projects are in current programmes, which includes projects underway but incomplete as at April 2024; all other works are new programmes.

Block	Estate	District	Ward	HRB	Possible Works Identified	No. of Homes	External Works Year	Heating year	Lift year
